Better Brains for Babies:
The mission of the Better Brains for Babies initiative is to improve the potential of young children by promoting the use of early brain development research in everyday life experiences. Better Brains for Babies is a collaboration of national, state and local, public and private organizations dedicated to promoting awareness and education about the importance of early brain development in the healthy growth and development of infants and young children. The initiative began in Georgia, and has become available to Kansas professionals through a partnership between University of Georgia Extension and K-State Research and Extension.

Topics Include: brain anatomy, brain development, experience & learning, and physical well-being
